Duration	3 mins 50 secs
Grade	**13.00** out of 15.00 (**86.67**%)

Question **1**

Incorrect

Mark 0.00 out of 1.00

What is the first step in binary search?

a. Compare the target element with the middle element in the list
b. Divide the list into two equal parts
c. Sort the list ✗
d. Compare the target element with the first element in the list

Question **2**

Correct

Mark 1.00 out of 1.00

Which of the following is a limitation of binary search?

a. It requires the list to be sorted ✓
b. It can only be applied to large lists
c. It is slower than linear search for small lists
d. It does not work with negative numbers

Question **3**

Correct

Mark 1.00 out of 1.00

In linear search, how is the element searched?

a. By comparing each element in the list sequentially ✓
b. By dividing the list into halves
c. By sorting the list first
d. By using a hash function

Question **4**

Incorrect

Mark 0.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 100; What are the mid values(corresponding array elements) generated in the first and second iterations?

- a. 90 and 100 ✗
- b. 94 and 99
- c. 89 and 94
- d. 90 and 99

Question **5**

Correct

Mark 1.00 out of 1.00

Which of the following scenarios is best suited for applying binary search?

- a. When the list is unsorted
- b. When the list is very small
- c. When the list is sorted ✓
- d. When the list contains duplicate elements

Question **6**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

- a. Quick search
- b. Bubble search
- c. Merge search
- d. Linear search ✓

Question **7**

Correct

Mark 1.00 out of 1.00

The average case occurs in the linear search algorithm

a. When the item is the last element in the array

b. When the item is somewhere in the middle of the array ✓

c. When the item is not the array at all

d. Item is the last element in the array or item is not there at all

Question **8**

Correct

Mark 1.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

a. Linear search ✓

b. Jump search

c. Hashing

d. Binary search

Question **9**

Correct

Mark 1.00 out of 1.00

In binary search, what happens if the middle element does not match the target element?

a. The search continues in the left or right sublist ✓

b. The search continues from the beginning

c. The search stops

d. The list is sorted

Question **10**

Correct

Mark 1.00 out of 1.00

_____ search takes a sorted/ordered list and divides it in the middle.

a. Linear

b. Both (1) & (3)

c. Hash

d. Binary ✓

Question **11**

Correct

Mark 1.00 out of 1.00

What happens when the element is found in linear search?

a. The search backtracks to find duplicate elements

b. The search continues until the end of the list

c. The search starts over from the beginning

d. The search stops immediately ✓

Question **12**

Correct

Mark 1.00 out of 1.00

Which of the following is not the required condition for a binary search algorithm?

a. There must be a mechanism to delete and/or insert elements in the list ✓

b. Number values should only be present

Number values should only be present

c. There should be direct access to the middle element in any sublist

d. The list must be sorted

Question **13**

Correct

Mark 1.00 out of 1.00

In which type of search is the list divided into smaller sublists during the search process?

a. Sequential search
b. Linear search
c. Hash search
d. Binary search ✓

Question **14**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

a. Dividing the list in half repeatedly
b. Skipping every second element
c. Sorting the list before searching
d. Checking each element sequentially ✓

Question **15**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

a. The first element is returned
b. The last element is returned
c. An error is raised
d. The search is considered unsuccessful ✓
